

Hyaluronic Acid Infusion Pack

Delivers moisturizing components directly to the skin

For wrinkles

For spots

For hair growth

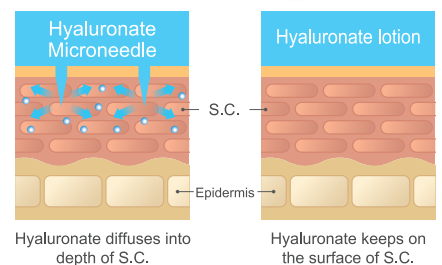

The “world’s first” microneedle technology

With the world’s first new technology, “Hyaluronic acid” is crystallized into micro size needles

Unlike the microneedles made of materials such as metals, we have achieved the highest safety level as they are possible to make it only with beautifying components. We deliver products with the highest quality as they are produced in our own domestic factory with the same quality control level as that of medical products.

By crystallizing it into the form of needles, we deliver components directly deep into the skin and care from within

It can be formulated not only with hyaluronic acid but also other soluble components, it can be used in original formulations as well. Also, it is possible to differentiate from products from competitors as it’s possible to design an original shape. Please consult us both for personal or professional use.

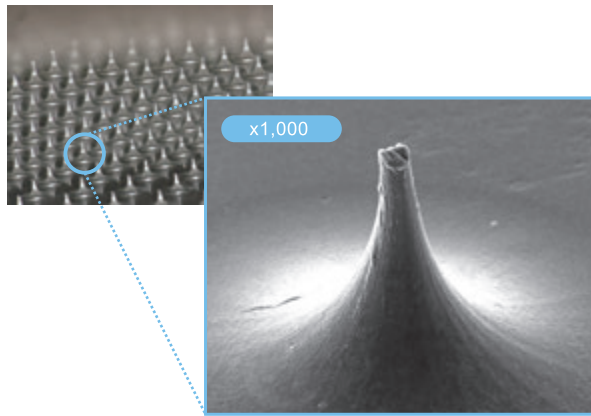

Microneedle cosmetics can directly deliver hyaluronate into the skin

Hyaluronate Dermafiller

The number of microneedles is over 200/cm² in the patch. When applied to skin, microneedles can insert into the S.C., hyaluronate of needles dissolve and left in the skin.

Microstructure

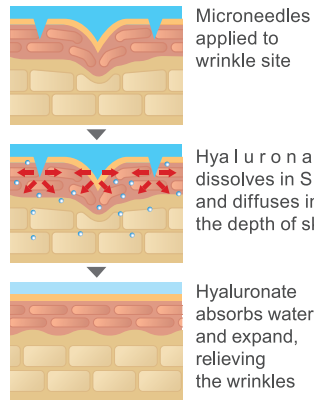

Protruding crystals can be seen on the surface when you look at them in micro size. This protruding shape is the key to deliver "hyaluronic acid" and "collagen" deep into skin cells.

Working Mechanism

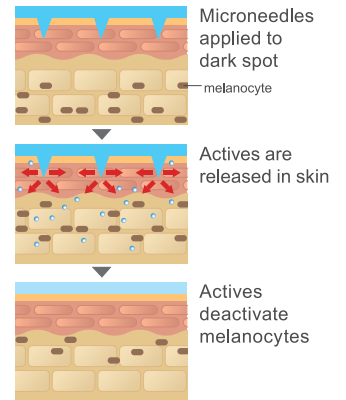

Antiwrinkle

Use of once or twice a week will achieve the long-lasting effect.

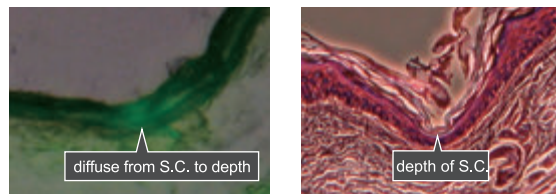

Brightening

Brightening components such as vitamin C will penetrate into the skin assuredly.

Microneedle - Insertion & Dissolving behavior

Inserted microneedles reaching at the depth of S.C.

Microneedle shape changed after application

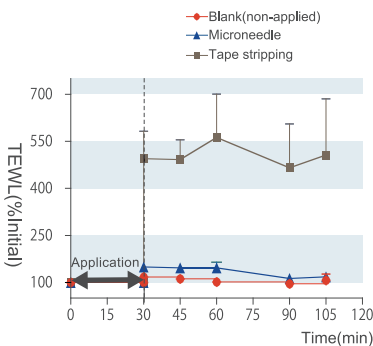

Skin safety data

◆No irritation in human trial

12 weeks test (22 volunteers)

Estimation	Item	result
Self Estimate	Itching	0
	Pain	0
	burning	0
Expert Estimate	Edema	0
	Redness	0

◆TEWL is similar to blank

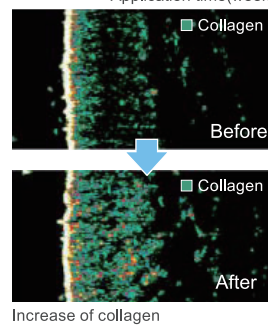

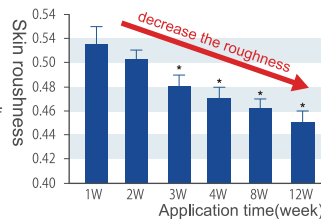

Efficacy(Antiwrinkle)

The biggest feature

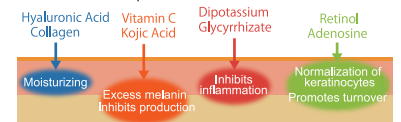

Gives moisture to the skin from within fundamentally. (Improvements of depth and area of wrinkles and firmness/promote collagen production of collagen in dermis)

◆Improvement of roughness of the skin (texture) (22 examples of clinical trials) (Use of once to twice a week around eyes for 12 weeks)

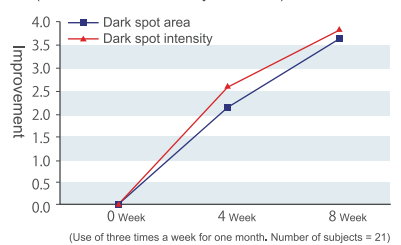

Efficacy(Brightening)

◆Spot improving approach with a hyaluronic acid infusion pack

◆Whitening effect in clinical test (Actives: Vitamin C, Kojic acid etc)

The following pages introduce reference cases.

Enhanced firming ingredients and the highest number of needles*1 in the industry for a "fine skin" *2

The density of needles has been increased to approximately 3,800 needles*3 (2.5 times the number of conventional products), greatly increasing the amount of penetration*4 of beauty ingredients*5. Two highly long-lasting hyaluronic acids*6 have been added to enhance the firming power of the product. In addition, carefully selected beauty ingredients such as retinol*7 and retinal*7 approach eye area concerns.

Dermafiller Premier for eye use

1 pair use(2pcs×1pouch) ¥2,200 (Tax included)
4 pairs/Box(2pcs×4pouches) ¥8,250 (Tax included)

Injection of hyaluronic acid*1*2 with ultra-high-density needles and ingredients specifically designed for the laugh lines

In addition to two types of hyaluronic acid*1 with a long-lasting effect developed by our company, we inject "hydroxyapatite"*3*4 to create and nurture firmness specifically for the laugh lines. With approximately 4,200*5 ultra-high-density micro-needles, 2.5 times*4 more than conventional products and the most in the industry, the product deeply and intensely approaches stubborn laugh lines.

Dermafiller Smile for laugh lines use

1 pair use(2pcs×1pouch) ¥2,200 (Tax included)
3 pairs/Box(2pcs×3pouches) ¥6,380 (Tax included)

Brightening ingredients are concentrated into a concentrated approach to blemishes

"SAKURAHAKU" is a needle-shaped crystallized brightening patch. The ingredients are directly absorbed*1 into the spots, leading to clear skin. Using together with Sakurahaku Essence for an even more intense experience is highly recommended.

SAKURAHAKU Whitening microneedle products for color spots care

8 pairs/Box (2pcs×8pouch) ¥8,800 (Tax included)

Two active ingredients block and shut out the causes of melasma !

Contains two active ingredients: tranexamic acid, the famous pharmaceutical ingredient recognized for its efficacy in improving melasma, and dipotassium glycyrrhizate, which has excellent anti-inflammatory properties. This product suppresses the formation of melanin and prevents freckles and spots. In addition, six types of Japanese and Chinese plant extracts approach the various causes of melanin production without placing a burden on the skin.

quasi-drug

SAKURAHAKU Whitening Essence

40mL ¥6,600 yen (Tax included)

Direct injection by Microneedles!

A sheet patch for the scalp made by hyaluronic acid*1 microneedles. Scalp care ingredients are crystallized and arranged in microneedles. The ingredients are injected directly into the scalp*2 for more effective penetration*2. Using together with Fasa Hair Growth Tonic is recommended.

FASA Scalp Patch

8 pairs/Box (3 pcs×8pouch) ¥12,100 (Tax included)

Special application adapter with original patent design!

In addition to Tongan Mozuku extract*4 rich in fucoidan, the product contains three active ingredients*3 and other ingredients carefully selected to work on thinning hair and hair growth. The patented applicator adheres closely to the scalp for superior penetration*2. This product is suitable for both men and women.

quasi-drug

FASA Tonic

150ml

¥5,500 (Tax included)

Only 1 minute ! Direct injection of Hyaluronic acid*1 !
To improve dullness*2 and vertical wrinkles*3 with microneedle technology.

This set includes a "microneedle pack" with approximately 800 needles*4 exclusively for lips and a "plump essence" containing rich beauty ingredients. Just one minute of application is all it takes to achieve full, plump, and flawless lips.

A set of "pack" and "serum" are included in each dose.

LIPS SHOT

1 set ¥1,408 (Tax included)

*1 Sodium hyaluronate (moisture retention) *2 Up to stratum corneum *3 Dipotassium glycyrrhizate, senburi extract, ginseng root extract *4 Seaweed extract(1)

*1 Sodium hyaluronate (moisturizing) *2 Dull appearance of lips due to roughness and dryness *3 Reduces the appearance of fine lines and wrinkles caused by dryness *4 Per application
