

# **BioDegmer<sup>®</sup>**

Biodegradable and Absorbable Polymers for Medical

**BioDegmer<sup>®</sup>** is a brand of BMG,

which manufactures a wide range of Biodegradable and Absorbable Polymers for Medical under the rigid manufacturing and quality control system based on ISO 13485.

BMG provides a wide range of custom-made and high-quality polymers tailored to customer's needs by taking advantage of the experience of more than 30 years.

BMG aims to be an ideal innovative solution provider to contribute to improving customer productivity and patient's quality of life.

**BMG INCORPORATED**  
Pioneer of bio-absorbable polymers

# BioDegmer® Products

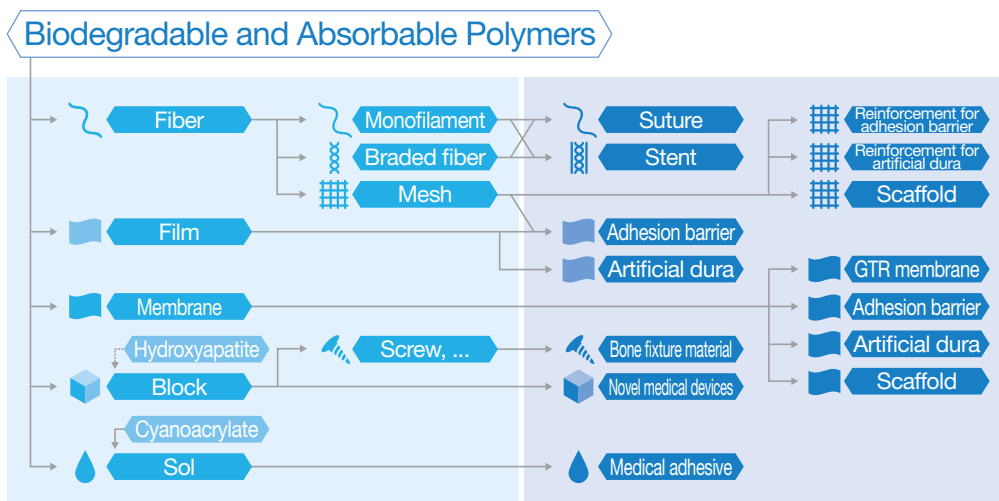

## Main biodegradable and absorbable polymers available

Code	Polymer Name
PGA	Polyglycolide
PGLA	Poly (glycolide- <i>co</i> -L-lactide)
PGDLLA	Poly (glycolide- <i>co</i> -DL-lactide)
PLLA	Poly-L-lactide
PDLA	Poly-DL-lactide

Code	Polymer Name
PDLA	Poly-D-lactide
LCL	Poly (L-lactide- <i>co</i> - $\epsilon$ -caprolactone)
PDO	Poly- <i>p</i> -dioxanone
PCL	Poly- $\epsilon$ -caprolactone

If additional product optimization is required, we can provide development input and custom synthesis.

## Application and relevant final products of “BioDegmer®”

“BioDegmer®” can be processed into various kinds of forms and applied to wide range of usage in medical fields. In order to improve patients’ QOL (quality of life), “BioDegmer®” is the ideal innovative solutions by its excellent bio-compatibility, bio-absorbability and flexible processing property.

The above are applicable examples of biodegradable and absorbable polymers.
