

MEGATRADE Corporation

Only One - Uncompromising technological development

We provide world-top level inspection machine and software through uncompromising effort in research and development. Also, we are striving not only to simply sell machine itself but to satisfy customers' needs at every phase of their business from system concept design to operation support and maintenance. Though our company consists basically of engineers, our business activity is always conducted with customer-oriented perspective.

Thank you, the 30th anniversary - PROGRESS

Over the past 30 years, we have been developing and selling visual inspection equipment for semiconductors, automobiles, films, flat displays, etc., starting with the inspection of printed circuit boards. We are focusing on print inspection equipment using these technologies.
