

Nishida Factory Co., Ltd.

株式会社西田製作所

<http://www.nishida-factory.co.jp>

Manufacturing | Manufacture of fabricated metal products

製造業 | 金属製品製造業

1-15 Koga Nishide-cho, Fushimi-ku, Kyoto 612-8496, Japan

〒6128496

京都府 京都市伏見区 久我西出町1番地15

¥10,000,000 (capital 資本金) 1-50 (employees 従業員数)

Area of Interest

Europe, Southeast Asia

欧州, 東南アジア

PR

At Nishida Factory, we are in the business of plating, can manufacturing, and five-face machining.

Our unique expertise covers a wide range of industrial facilities, as well as pharmaceutical, food, and entertainment facilities such as stage sets.

In addition, we are prioritizing the digitalizing of information that has traditionally been managed in analog form. We are also using AI to move away from relying on individual skills and transition to standardizing work processes.

We are also working to develop motivated and driven human resources, build a corporate culture where all employees can think and express their thoughts, and increase the number of multi-skilled workers.

Our strength lies in our power of synthesis to combine our ability to anticipate and respond to changing times, our ability to act quickly, and our technical capabilities.

業種は板金、製缶、五面加工。

各種産業設備はもちろん、製菓、食品設備、舞台装置などのアミューズメント関係など、当社独自のノウハウで幅広く対応させていただいています。

また、アナログ的管理が多かった情報を「IT化」し、尚且つ「AI」を使って属人化を標準化に変えていくことに力を注いでいます。

更に「やる気と向上心」に満ちた人材育成にも力を入れ、当社で働く全てのスタッフが発想し発言できる社風を築き、多能工化を高めていくことに取り組んでおります。

時代の変化を読む力と対応力、スピード感ある行動力と技術力などを合わせた統合力こそが当社の強みであります。

Product technology

At Nishida Factory, we achieve machining and quick turnaround times beyond the norm for precision sheet metal machining. This is possible because of our extensive experience in fabricating components for a wide variety of industries, combined with the sensitivity of our craftsmen who have an intimate knowledge of fiber lasers and other machines, and the advanced technical skills of these craftsmen that produce beautiful, strong welds. Nishida Factory offers high-performance solutions to meet your needs. This includes the ability to machine thick sheet metal and deliver quickly from our highly productive facilities.

西田製作所では、多彩な業種の部品製作に携わってきた豊富な経験、ファイバーレーザーなどの機械を知り尽くした職人の感覚、美しく強固な溶接を施す職人の高い技術力で、精密板金の常識を超える加工と短納期を実現しています。厚板加工や、徹底的に生産性を高めた工場での素早い対応など、西田製作所にしかできない高いパフォーマンスでご要望に応えます。
